

15 Temmuz AİHL News

10th May

Nature is in danger.

MY REAL LOVE
Nature is my love,
Nature is my house.
I can not think a life,
Without staying outside.

Save soil, save water,
Save everything in the nature.
It is useful for your soul,
If you go out, that is all.

Never pollute a drop of water,
Many animals live in the water.
It is important to save the sea,
Sea is the nest, if you can see.

UMUT'S & EREN'S & EYMEN'S SUGGESTIONS FOR THE NATURE

We should separate rubbish and recycle

We should use public transportation  

We should plant trees  

We should save animals    

<u>11th May Saturday</u>	14C, thunderstorms 
12th may Sunday	18C partly cloud 
<u>13th May Monday</u>	21C Clear 
<u>14th May Tuesday</u>	21 C Clear, warm 

Renewable energy is environmentally friendly

A clean energy source means low or zero carbon and greenhouse emissions. As fossil fuels cause global warming, they emit high amounts of greenhouse gases and carbon dioxide, which are largely responsible for climate change and deterioration of air quality. Fossil fuels contribute to the emission of sulfur into the atmosphere, which causes acid rains. Acid rains can damage buildings. Solar and wind energy are considered environmentally friendly because it does not emit zero toxic gas to the environment. The use of renewable energy significantly reduces dependence on fossil fuel as an energy source, thus reducing air pollution.

Ahmet Selim USTA & Enes ÇAKAR

Every year, 1.3 billion tons of food is wasted in the world. the avare of Türkiye is 26 million tons. 1 billion dollars are wasted annually. in our country 224 billion liras are wasted.

Arif TÜMEN & Yunus Emre DEMİR & Ahmet Buğra BİLİCİ

Many animal species in the world are endangered and in danger of extinction. These animals include popular species such as fillies, tigers, gorillas, sea turtles, polar bears, orangutans and penguins.

There are many reasons why these animals are in danger of extinction. Parts such as deforestation, hunting, climatic conditions, and destruction of living conditions by humans reduce the survival rates of these animals.

M. Yusuf BOZKURT & Yuşa ARIKAN & Ali Ekber ELLERİ

Nature has an important place for our lives. We see our future by offering us a beautiful life with its existence. The peace we find while cleaning our lungs with a clean oxygen keeps them away from stress. In order to rest, we need to take advantage of every opportunity that nature offers us.

We want him to relax to leave ourselves in the arms of nature to calm us down. Let's protect the world, let's keep the environment clean
